

# Rigging Services

*The MCCA provides overhead and ground supported rigging and lighting services through our service contractor, JCALPRO. All overhead rigging and ground supported truss are provided by and installed by JCALPRO.*

## Planning Ahead for Rigging & Lighting Services

Diagrams and booth layouts are essential for planning rigging and lighting services. In order to ensure efficient delivery of required services, Exhibitors must submit rigging plots, drawings, blueprints, or engineers' certification with their orders. Diagrams must include the location, dimensions and weight, and the height from the floor to the top of the suspended item. Diagrams must also show booth outline with aisles or neighboring booths marked for reference and orientation.

<b>PACKAGE RIGGING SOLUTIONS</b> The MCCA offers package rigging solutions for exhibitors with basic and straight forward sign hanging needs. To qualify for the packages, exhibitors must be flexible with regards to days and times of load-in and take-down.	DISCOUNT	STANDARD	ON-SITE

<b>Cable Bridge Package</b> This package includes all lifts, labor, and equipment for a truss cable bridge for overhead power orders 60 amps and above, and for all 480 v overhead power. This package does <b>NOT</b> include the electrical service. Service must be added separately. <b>Overtime Charges</b> Exhibitors may request rigging services on weekends, holidays or outside the package service hours (Monday-Friday 8AM – 5PM). In this case, an Overtime Charge must be added for each rigging package ordered.		\$458.00	

## Custom Rigging & Lighting Solutions

The MCCA/JCALPRO also offers customized rigging and lighting solutions for Exhibitors with more complex or unique requirements. This option is best suited for Exhibitors with larger signs, multiple signs, and/or overhead lighting needs.

Custom Rigging and Lighting Solutions still require flexibility in load in and load out time. If you require a specific load in or load out day and/or time, hourly rates may apply (see Terms and Conditions – Page 15).

Custom Rigging & Lighting solutions may only be ordered with a pre-arranged quote.

Please contact JCALPRO at EXHIBITS@JCALPRO.COM or 1.617.954.2345 to initiate this process as these services are not available for online ordering.

## FREQUENTLY ASKED QUESTIONS

### How do I know if I qualify for the Basic Rigging Package Rate?

Find out the dimensions and weight of your sign. If your sign weighs less than 150 pounds and is less than 15' in diameter, is less than 20" in length, and less than 175 square feet and does not require electrical rigging, truss, or motors, you will qualify for the Basic Rigging Package. If your sign fits within the basic package and is motorized or needs electrical rigging (for example a rotating sign or a sign with lights), you qualify for the Electrical Rigging Package.

### Can I order lighting to be suspended from the ceiling?

If you would like to order lights to brighten up your booth or illuminate specific objects, you will need to get a **quote** from JCALPRO. Lights cannot be attached to our ceilings. Instead we can provide you with truss, using motors, to create a lower "ceiling" and then hang lights from that truss. We will require a diagram showing your booth layout and exactly what you want illuminated in order to put together a quote.

### Do I ship my sign to you to put it together?

No. Although JCALPRO provides labor to hang the sign, the General Service Contractor (GSC) handles all shipments. You may build your sign or hire the GSC to put it together for you. When the sign has arrived at the building and has been assembled, we will hang it for you. Be sure to keep this in mind when making your time and day requests for sign hanging.

### Can I request load in and load out times?

Yes, the Rigging Order Form has a space for you to indicate your preferred up and down times. Please note that your preferred timing is not guaranteed; however, we do try our best to cater to your requests. If you absolutely need a specific install or take down time, additional charges will apply. If you do not provide a diagram or layout prior to load-in, then you may experience set-up delays and additional cost.

### What type of diagrams should I send?

The most useful diagrams are on a proportioned grid to show the dimensions of the booth, the exact desired placement of hanging items, and orientation of the booths around yours. As a general rule, pictures from previous shows and pictures of the sign only are not as helpful as current diagrams of the entire booth space with the placement, height, and weight of the sign(s) or hanging item(s).
